Grounding Material Set

for pipelines

Secure potential equalization between pipe segments

The grounding kit for piping provides a secure and conductive connection between pipe sections and ensures efficient equipotential bonding in your system. Ideal for use in pneumatic conveying systems, process plants, and anywhere else where reliable grounding is required.

Complete set: 2× strip grounding clamps + 1× 16 mm² grounding strand with wire end ferrules – for DVK-6 and DVK-HD pipe connections

VDE-compliant grounding

Easy installation

Robust & durable

Certified Quality

Technical Specifications	
Set components	2× band grounding clamps + 1× 16 mm² grounding conductor with ferrules
Application	for pipe connections with DVK-6 or DVK-HD and stainless steel pipe couplings
Coupling	Type DVK-HD – max 14 bar overpressure, tightening torque 60 Nm
Grounding connection	Band grounding clamps made of stainless steel, standard
Grounding conductor	16 mm², green-yellow, with ferrules
Certification	VDE-compliant coupling parts
Origin	Made in Germany
