Material Storage Bin

HS MaterialDayBin 120/240

The mobile day container for plastic granulates – the smarter and more cost-effective alternative to stainless steel day containers.

- Standard stainless **steel suction lance holder** for safe operation
- mobile version with **built-in wheels** for flexible use
- **spherical tank bottom** for nearly complete drainage of residuals

Standard

Spherical container bottom

Specially shaped spherical bottom for almost complete residual emptying – no material loss, faster material change.

Optional

Bag dump grate for plastic pellet handling

For safe and ergonomic filling from 25-kg sacks – made of stainless steel, precisely fitting the filling opening.

Optional

Hinged lid with compressed air cover slider

Prevents entry of foreign material, dust, or moisture into the container – for clean processes and protected granulate.

Additional benefits:

- ✓ Cost-effective alternative to stainless steel day containers
- ✓ Robust and durable HDPE design
- ✓ Standard holder for suction lance
- ✓ Reusable and sustainable
- ✓ Ideal as a day bin for direct machine feeding

Technical Specifications	
Nominal volume	120 liters / 240 liters
Container material	HDPE (high-quality plastic)
Design	Mobile, with wheels
Lid	Hinged lid
Color	Red (other colors on request)
Suction lance diameter	ø 40 / 45 / 50 / 60,3 mm
Suction lance material	Stainless steel 1.4301
